GROUP ARESTA

Corporate Presentation

Building a more sustainable world since 2010

ENGINEERING AND CONSTRUCTION

We work together to reimagine the future of construction, in a way that is accessible to all and, most importantly, sustainable.

ARCHITECTURE

We are UCHI. We create architecture, landscapes, interiors, commercial spaces and everything that you can imagine.

Founded in Portugal, 2010.

TOURISM

TOURISM

KIOSK

(Who) are we?

We have started as a small family business back in 1990 under a different name, at the time only operating in the public works sector. However, we have expanded the areas of activity with the incorporation of strategic companies to complement the services we provide, while always keeping the traditions well present.

1

PROCUREMENT

We are always looking for the next exceptional land to create the a new project. We invest and sell the land with the cost diluted in the asking price.

2

ARCHITECTURE

We seek the balance of design, sustainability and cost control. We materialize your idea with our experience.

3

CONSTRUCTION

The last step of the process is its materialization! Build at your own pace and without surprises. Each project is properly optimized to meet your budget.

RESIDENTIAL

RESIDENTIAL

TOURISM

(What) we do?

At UCHI we believe that architecture should be accessible to everyone.

1

Residential

Has that special moment to build your new house arrived? We can't wait to hear your idea! Tell us everything you want and wait to be surprised.

2

Commercial and Tourism

Office? Kiosk? Tourism project? Great! At UCHI you can find all these solutions and more!

3

Special Projects

Do you like to change locations? No problem! At UCHI we develop solutions that allows you to (literally) take your home with you.

Our Process

At UCHI we don't like to work with price lists and standardized projects. We believe that architecture is a symbiotic process between the land and its future occupant. We are here to mediate and advise you throughout the process.

Our projects are merely ideas to inspire you. Risk it, scratch and deconstruct everything. You will see that in the end something absolutely fantastic will come out of it!

TOURISM

TOURISM

TOURISM

(How) to do it?

If we don't work with a price list, how can you know if UCHI is your ideal partner? Talk with us by following the steps on the side:

1

(WHAT) DO YOU NEED?

Tell us your idea. The more information you can provide the quicker and precise our response will be.

2

(HOW) DO YOU PLAN TO DO IT?

What are your conditions? What is your available budget? Do you already have the idea for the project?

3

(WHEN) DO YOU WANT TO START?

Not everything in life needs to be done for yesterday. The project starts when you are ready for it!

Seems real?

At UCHI, in addition to maintaining the traditions of sketch architecture and making models to design projects in the most didactic way possible with our customers, we are also able to work with the latest 3D visualization technologies.

GET INSPIRED

TO

We provide you with a base for inspiration. Print, scratch it and change everything you want. Let us get your idea at the end!
